# COLORADO MAKES A HOISTING RECORD

During Part of Last Month Lusty Fortune Was Brought to Surface.

ORE CHANNEL ONE OF UTAH'S WONDERS

Well-Known Engineer Gives Some Facts About Noted Ore Shoot.

One of the first to recognize in the famous Colorado ore channel the earmarks of what that avenue of mineral wealth has actually been developed to be. J. Fewson Smith, chief of staff of the United States Smelting, Renning and Mining company has nothing but highest preise for it today. Mr. Smith returned late Tuesday evening from Thitle, and to The Tribune he states that during a part of last month the Colorado management from one shaft holsted \$290,000 worth of rich ore, and this extraction did not make a hole in the ore body larger than 20x150 feet.

Mr. Smith deems the revelations on the Colorado property simply mayerlous. The rich body of ore lies demonstrated three-quarters of a mile in length through the Colorado, Eeck Tunnel and the Sloux Consolidated, and he states there are geological evidences that the ore will maintain its extent and identity for another half-mile before it will pass through the from Blossom to be scattered and absorbed in the iron and copper deporits characteristic of the southern limits of the Tintle mineral zone.

Though the concentrated core of this lode has been gouged out for a few hundred feet in the Beck Tunnel property, he states, there is not a foot through the considered as exhausted, or that will not furnish ore that will be sought after by the smelters when handled as usual by one with the patience of a Josse Knight. Mr. Smith expects this vehi in places to contract, but eventually the mines will come out all right.

Mr. Smith says it would be useless to estimate the quantity of ore now available in the Colorado alone. It is well known the ore is reached by two shafts and that the drifting on it aggregates nearly 1000 feet, yet there is no place where the full lateral dimensions or limits have been worked to. As to the Sloux Consolidated, he says this management has gained the Colorado vein without doubt, and he believes this property will have 500 feet of the vein to, develop which may possibly equal, if not surpass, the values and volume of the ore on the Dolorado.

#### EAST GETS MORE DATA ABOUT BOSTON CON.

The following tables give the production of copper by the Boston Consolidated Copper company, both from its sulphide and porphyry deposits, in detail, for the past three months:

Car. Tons Pounds

Sulphide: May	.218 .101 .122		926 922 913	Cor 38 244 234	1,0
Porpiers	Carteasts	Tota ore	Tons Conc.	Line Copper	Par Cent.
May June	437 3	15.670 21.187 21.500	1301	369,000 456,400 452,000	7.0

The sulphide shipments have been reluced somewhat because of the low price
for copper and the need of further develepment work. The fact that in May,
1440 tons of concentrates containing 369,
1600 pounds were obtained from 13,570 tons
of concentrates containing 425,000 pounds
of concentrates containing 425,000 pounds
copper were obtained from 21,500 tons,
would indicate that Boston Consolidated
is now treating a better grade of ore and
securing a far better concentration.—Boson News Bureau.

### WORK SOON EXPECTED ON SAMPLING WORKS

The Tintic district expects the Taylor & Brunton Ore Sampling company to begin actual work of excavating for its new sampling works in that camp at any day. Visitors from the district say the company has constructed & morsey offices for the work in hand, and the site of the new plant looks decidedly like business. The company will expend something like \$50,000 on a modern and large sampling works to take lare of the Tintic eres, or the orea of any district shipping to the Tintic smelter.

### BEAVER CARBONATE WORK NEARING THE RESOURCES

Grant Snuder, manager of the Beaver Carbonate property, stated after his return yesterday from the mine that the shaft had guined the 700-foot level, and work of crosscutting and drifting soon would be under way. This work will be started soon as the station is cut, and Mr. Snyder expects ore within a very short time from the day of beginning this work at Jepth. The shaft has been in ledge matter for some little distance above the 700 invel, and progress was made at a merry cilp. The property is an old producer, and the past development has demonstrated the existence of ores which are awaiting modern-day extraction.

### When You Buy Mexican Mustang Liniment

You get the best known agent for the instant relief of pains attending

Burns, Scalds, Cuts or Sprains.

Equally good for MAN OR BEAST.

The Standard Household Remedy for Sixty Years. 25c, 50c and \$1 per bottle. The large size contains eight times as much as the small bottle.

### PUBLIC STILL REMAINS AWAY FROM MARKET

Wonder-Adams Bros.

Wednesday was another quiet day, free from excitement and nerve-wearing features. The investing public is in a waiting mood, preferring to buy in on a rising market at higher prices than now prevail with a wait of unknown dimensions confronting the market. Altogether on Wednesday 51,555 shares of stock passed hands, the market value of which amounted to \$31,855.56. The following were the closing unlisted and listed stock transactions:

## REXALL TUNNEL NOW CLOSE TO RESOURCES

Mine Management Sends Down Good News for Local Owners of Group.

In a letter to the local officials of the Rexall Mining company on Wednesday, the mine management sets forth one of the most gratifying state of affairs of many months, and protents that leave a good taste in the mouths of those interested. The company is driving a long tunnel from the Big Cottonwood to the Little Cottonwood side of the mountain within its lines, for the double purpose of getting for many months, and the management reports a decided change for the better in the formation. The block lime has given way to what is termed the safe with are thought to carry lead and silver values pending assays returns on the same. It is thought that not over the main ore bedy, and the mine management of the same in the s In a letter to the local officials of the

New York-Boston Letters.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private wire vesterday afternoon:

Walker Letter—New York—The market was very dull and steady today. There seemed to be a lack of commission house business and trading was very light. In the afternoon the whole market braced up and became streng. General feeling was that things looked much brighter. There was no news of importance and the market was strong until the close. It was assumed that one of the reasons for the advance was short covering, not only for account of the falled firm, but for other shorts, who have difficulty in horrowing, many firms not caring to loan stocks.

### HOW SILVER AND LEAD PRICES HAVE COINCIDED M. S. Hanauer, J. V. Sader, 152 S. West Temple. P. O. Box 1440.

It was stated vesterday in these columns that local circles had expected that lead and silver would advance in price together, the hope being father to the thought in a large measure, but the career of both metals during the past few years would lead to the conclusion which Utah circles have found erroneous. George W. Riter, the well-known mining engineer, has prepared a chart of the various metals, showing from the year 1898 to date the various fluctuations of their prices, and the increase or decrease in their production.

A study of this chart shows that from 1898 to 1897 the prices of lead and silver were independent of one another, lead showing a constantly decreasing tendency in the main. This was due in part to the panic and to the tinkering with the tariff of the metal. But from and after 1897 to a few months ago lead and silver maintained pretty much an even temper—

ament. When one would rise the other rollowed, and vice versa. One big exception to this rule is found in the present situation. Lead is growing stronger with the return of normal industrial conditions, while silver, depending so largely on the crop conditions of the Far East, is wailowing in the slough of despond with nothing to indicate as yet any change for the better in the immediate future.

Rumor That Noted Operator
Was Pleased With the East

Tuture

So while local mining circles have hoped the two metals would rise in price together for the sake of the mines of the State, there was some reason to anticipate such a result in the light of past Recent Stir in Copper Abroad.

Carbonate.

Between reports of splendid effort and results in the South Fork of the Big Cottonwood on innumerable mining properties, come rumors of attempted deals on the part of those taken with this busy and seldom mentioned mineral section of this State. Among the busy properties the past Carbonate, one of the old producers of days gone by the content of this State. Among the busy properties at present te the Dast Carbonate, one of the old producers of days gone by the core of the owners have been busy for many moment resources that an aerial tramway is being installed to bring the ores down the mountain to market. This tramway is an eight-tower equipment, and is very near completion.

Not long ago, gooes the rumor in local circles, Jesse Knight, the wisard of Thick, happened along that way to inspect some holdings of his own. He happened to hear of and to visit soon thereafter the East Carbonate territory, and to have cyldenced his regard for the same by an offer of substantial proportions for either the control or the entire proposition. The report goes that his collection of the tenture and thort ability to make it one of Utah's generous profit-makers. The the thine and their ability to make it one of Utah's generous profit-makers. The present activity stated after the mine and thought stated after the mine and though and a subsequent period of neglect of eighteen years' duratien. Those who know the district say Big Cottonwood never was in a more deal condition for telling results than a busy one up that way.

New York Mining Stocks.

James A Pollock & Co., bankers and prokers, 6 West Second South, furnish the following New York mining stock quotations, received over their private wire yesterday:

### UNCLE SAM MARKETS THREE RICH CARS OF ORE

There can be little doubt that the Uncle Sam Consolidated company will be ready next month with its usual five-cent dividend. The management is now receiving the settlements for three cars of ors, the shipment being certain to not in the neighborhood of \$10,000. This ore averaged about \$127 per ton, and comes from the new find which provided such a rich consignment some time ago. This shipment is all the more significant for the reason that it was shipped just as it was broken, no attempt being made to sort it.

Ore Shipments. The Pioneer sampler on Wednesday re-leased 5 cars of ore from Utah camps. The Taylor & Brunton company re-leased 4 cars from Utah and 1 from Ne-vada camps.

Ore and Bullion. The ore and bullion report for Wednes-day, given by McCornick & Co., was as follows: Ore received, \$59,000; bullion shipped, \$75,000.

Metal Market. The inetal quotations for Wednesday, posted by McCornick & Co., were as follows: Silver, 51he; iead, \$4.60; copper, 12 5.160.

13 3-16c. Mining Notes,

J. McChrystal, the well-known mining operator, has returned from a visit to Idaho mining camps. Idaho mining camps.

Thomias Weir, manager of the Ute Copper company, spent Wednesday in Bingham inspecting this property.

The officials of the Luiu Mining company have completed arrangements for commencing development work during September. The property has about 1000 feet of deep development work already accomplished, and the management will be able to begin the new campaign right on the ore. The mine is finely equipped for work also.

Superintendent J. E. Beveridge of the Superintendent J. E. Beveridge of the Flagstaff Copper company is in the city

Union Assay Office.
